### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitation(s) of a reference sensor detecting the value of one of humidity and temperature proximate to the body and to generate its own electrical characteristic relative to the value detected by the reference sensor are not anticipated or made obvious by the prior art of record in the examiner's opinion. For example, **Speasl et al. (US Patent No. 6,901,971)** disclose a toy (anything can be considered a toy that gives amusement to a user); a first sensor (404a, which senses temperature through a channel) responsive to an environmental factor (*such as temperature*) in a first location; a second sensor (404a, which senses temperature through a different channel) responsive to an environmental factor (*such as temperature*) in a second location (col. 4, line 67 through col. 5, lines 1-3); an output device; and a processor (418) coupled to the first (404a, through a channel) and second sensors (404a, though a different channel) capable of comparing the environmental factor in the second location and activating the output device (*such as an audible alarm when a threshold difference in the environmental factors is sensed - col. 7, lines 34-43*); the environmental factor is humidity (col. 6, lines 1-10); the airflow across the sensor is substantially restricted (*the airflow across the sensor restricted from the ambient environment outside the container*). **Smirnov (US Patent Application Publication No. 2001/0041496)** a toy having a breath sensor; a processor connected to the breath sensor; a speaker (4); the processor (21) activates the

Art Unit: 3711

speaker (4) when the electrical characteristic of a sensor indicates the presence of breath (paragraph 0077, lines 1-7). **Chan (US Patent Application Publication No. 2002/0086607)** teaches a toy that provides a response depending on the quantity of breath (the quantity of breath is detected by a microphone which permits the doll to provide a whisper or non-whisper mode response, paragraph 0041). However, the prior art fails to teach a reference sensor detecting the value of one of humidity and temperature proximate to the body and to generate its own electrical characteristic relative to the value detected by the reference sensor

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
